

Designed to cover four bedrooms within a small size footprint, the Paco comes with a lot of value. The garage smartly offsets the home to create a private outdoor space. The kitchen is a good size and includes a scullery. The main living wing has the option for a flat, scissor or sloped ceiling, which can make a big difference in interior feel. With the Paco, you can get a lot of family home within a smaller budget.

Floor Area: 201m²
